

The Residential Collection

Model: 22" Polar White Frameless

In 1997 Aquavision® pioneered in-wall and waterproof televisions

Since creating the world's first waterproof television in 1997, Aquavision's innovation team have remained market leaders in the sector of in-wall televisions and developed a network of professional partners worldwide.

Often copied but never equalled, purchasing an Aquavision means acquiring the core values at the heart of this very British success story: Ingenuity, Quality and Reliability.

Once only associated with water-contact zones such as the bathroom and kitchen, Aquavision's streamlined styling and invisible technologies are now increasingly prevalent throughout the home.

Aquavision offers customers an unrivalled choice of sizes, styles and finishes coupled with an emphasis on innovative, future-proof technologies.

With screen sizes from 16" to 42" and a choice of glass colours, there is an Aquavision to blend into every room setting. No cables, no visible connections, just a television to enhance your room design.

Specialist advice, installation expertise and on going support are merely a telephone call away thanks to an in-house technical team based at the company's HQ.

With this in mind, it is hardly surprising that Aquavision have unwittingly gained the reputation of being "the preferred choice of the professional".

A balance of elegance and substance make up part of our recipe for producing world class, hand built, high performance televisions for all applications.

Stay connected in the Bathroom

Aquavision® gives you a safe, stylish escape in the haven of your bathroom. The fully waterproof televisions have the best viewing angles in the industry, ensuring perfect visibility from anywhere in the room.

The invention of the first Aquavision featuring waterproof speakers, a waterproof remote control and, of course, a waterproof screen coincided with a shift in mentality towards 'the

bathroom'. No longer was it simply a place for washing and bathing moreover a space to relax, recharge the batteries and embrace some precious 'me-time'. Whether catching up

on downloads, listening to favourite tracks or keeping up with current affairs, an Aquavision will transform your bathroom from a functional space to your own personal sanctuary.

Stay connected in the Kitchen

Aquavision® televisions offer full High Definition screens with the widest viewing angles available, ensuring a crystal clear image that can be seen from anywhere in the room.

After initial success in the Bathroom sector came a demand for Aquavision screens within a kitchen and dining environment. A trend towards open-plan living favoured the integration of audio-visual technologies into cooking and dining zones. Aquavision

televisions are wipe clean and safe to be installed behind the hob. As well as being compatible with all major home automation systems, current models feature Digital Freeview, USB input, HDMI connections and a Sky link to connect, watch content and

control a Sky box via the Aquavision device. Every element of today's modern kitchen has been cleverly designed to combine luxury with functionality. An Aquavision should be an intrinsic part of the overall design, not an afterthought.

Bespoke MirrorVision+®

An increasing number of unique products and an unrivalled know-how make Aquavision® the preferred choice of the design professional.

Specialists in the design of audio visual systems, Aquavision offers a unique bespoke service, incorporating any size and model of Aquavision screen (from 16" to 42") concealed within glass sections of up to 2.4m x 1.5m, providing endless design solutions.

Incorporating MirrorVision+ technology, the screen can be hidden within what appears to be a perfect mirror with no visible signs of a screen when the tv is switched off, yet allowing the television image to be clearly seen when the tv is switched on. MirrorVision+ models are

perfect for bedrooms, living rooms, studies, bathrooms or anywhere there is a requirement for a discreet, seamless television installation. Aquavision supplies bespoke glass solutions for special applications enabling the creation of unique designs. The 6mm thick, glass with polished edges, with one or more

Model: 22" Bespoke in MirrorVision+

Selecting the most suitable Aquavision®

Selecting the correct Aquavision® model to suit each application is made simple by a few easy to follow combinations. The majority of requirements are met by the Aquavision® Essential collection, just select the screen size and everything is included.

For a more versatile or personalised system, clients are able to build their own combinations using our Extended Range.

Aquavision Essential

The first choice for stand alone television requirements, suitable for the majority of applications and understandably the best seller in the range. The popular Genesis operating system providing:

- MirrorVision frameless glass
- Unique 178° viewing angle
- Anti-mist heated screen
- Sky Link to Sky Box
- Digital Freeview Tuner
- 2 x HDMI Inputs
- Scart connection
- Full compatibility with home audio systems
- Built in amplifier
- 2 x AVF-4 speakers and cables

All provided in one box – simply specify a screen size: 16", 22", 27", 32" or 42"

Aquavision Extended Range

Features

As well as the Genesis platform that is available in the Essential range, Aquavision also offer the following:

Nexus

- Freesat HD and Freeview HD receivers
- Available in 16", 22", 27", 32" & 42"

Pinnacle

- Freeview HD receiver
- Android Smart TV (providing local Hotspot)
- Available in 16", 22", 27", 32" & 42"

Nexus and Pinnacle are fully compatible with home control systems and offer discreet IR and RS232 controls as standard, enabling compatibility with all leading control systems, including AMX, Control 4, Crestron, RTI etc

Glass Finishes

Black

Polar White

MirrorVision®

MirrorVision+®

Black & Polar White. Using Optically Clear glass for exceptional clarity & picture quality.

MirrorVision® Turned off, the glass has a slightly tinted mirror finish. Turned on, the mirror gives way to the television screen.

MirrorVision+® A perfect mirror with no visible signs of a screen when the television is off but allows the television image to be clearly seen when switched on.

Frame Styles

Frameless

This simple, unobtrusive glass screen design will merge into any room décor and wall finish. Frameless is currently the most popular screen design from which the Essential collection is built.

Classic

The original, iconic Aquavision® design. With a high quality, polished stainless steel bezel that gives a statement of pure luxury whilst framing the glass front. This option provides a fully flush in-wall appearance. For sizes up to 42" only

Silhouette

Sleek lines combined with an ultra-thin profile (cleverly hiding the mounting frame) that neatly conceals any cabling, all brought together to produce an impressive 'suspended-in-air' on-wall alternative.

Aquavision®

Proudly designed and manufactured in Britain.

Aquavision are proud members of the Made in Britain campaign, a marque created by UK manufacturers to support and promote British Manufacturing in the United Kingdom and overseas. As prolific inventors and innovators, the company is considered a prime example of the wealth of know-how, specialist expertise and technical acumen that exists in the UK and for which the Made in Britain association was founded to showcase and celebrate.

Warranty

All Aquavision products are covered by a 2 Year Warranty.
