

TEST KIT

EX-1FIB-5000

WyreStorm
DIGITAL INTEGRITY

TEST KIT

The WyreStorm test range has been developed to assist commercial and residential integrators with the ability to diagnose AV systems and digital connectivity on installations, saving both time and money, particularly when assessing cabling prior to installation.

All of the equipment in the test kit can be powered via the 5v battery packs included, for extra flexibility. The test kit includes the required tools to assess the cable for bandwidth and transmission capability.

Included In The Kit

Signal Generator –

Capable of sending high resolution 2D Test patterns the Signal pattern generator provides EDID on screen readout via the Display Data Channel (DDC). Ideal for pinpointing any issues of interoperability via sources, switches and matrices etc. With over 32 preset patterns and 16 preset resolutions, almost any combination of signal can be fed to the display for testing the cabling and source devices.

7" Full HD Test Monitor –

Designed to provide digital audio and video feedback on signal outputs, recognizing any HDMI or DVI sources up to 1080P or 1920 x 1200mm and provide a readout of the display output. The perfect tool for pre-commission testing prior to full displays being installed.

In The Box

7" HD Test Screen	1	AC Power cord(EU)	2
Signal Generator	1	CD (Manuals)	1
In-line HD booster	1	Remote Controller	1
Line-in one adapter	2	IR Receiver cable	1
Three-pin AC power cord(UK)/US	2	USB Cable	2
5 Volt Portable batteries	2
